

e

literal-write instruction	tar benign	tar lethal
present	Z80 open, then closed · 67 of 80 worlds modified BFF, harmless brackets open through 16,384 epochs · 12 of 12 no closed design found (period ≤ 10)	modified BFF, lethal brackets open, then extinct · 12 of 12 worlds Z80, zero halts born closed, late · 10 of 10 worlds the open beginning never happens
absent	BFF as published, harmless brackets born closed · 7 of 12 worlds; lost again in 4	BFF as published born closed · 28 of 28 (published and wrapping pointer)

lethal tar ends the open phase before it begins (Z80) or soon after (BFF); life then starts closed if a closed design exists, and late
